

Sensitive Diagnosis 2019

Chronic diagnoses are identified via claims, Health Maintenance Records (HMRs), and 360 exams by all health care providers specific to a patient. Recapture of these chronic conditions provides confirmation of diagnosis and ongoing treatment for the patient. The U.S. Department of Health and Human Services [hhs.gov](https://www.hhs.gov) and specific state laws provide explicit guidance when caring for those with diagnoses that are sensitive in nature. Sharing a diagnosis, which is sensitive in nature, is restricted unless there is concern for harm to the patient. This is not an all inclusive list but rather highlights the more common diagnoses. For questions please contact ccqj@healthspring.com or visit the ICD-10 webpage at [MedicareProviders.Cigna.com/icd-10](https://www.MedicareProviders.Cigna.com/icd-10)
